Press Release

Low Voltage Soft Starters Now Available from Solcon USA Ratings from 230-1000V up to 3000A

TIERRA VERDE, FLORIDA USA, JUNE 12, 2009: SOLCON USA is pleased to announce the availability of the ***RVS-DN*** and ***RVS-DX*** low voltage soft starter product line in North America. As one of the leading manufacturers of solid state reduced voltage soft starters, SOLCON INDUSTRIES LTD. established SOLCON USA to service and support the North American market by having readily available inventory in their soon-to-be established warehouse locations in the U.S. Technical and sales support is provided from SOLCON USA's headquarters in Florida and through select representatives located in key market areas.

SOLCON has been manufacturing low voltage solid state soft starters for over 30 years. The company is recognized throughout the world for their highly engineered motor control products, including the ***HRVS-DN*** medium voltage soft starter with ratings from 2.3-15kV.

The **heavy duty *RVS-DN*** and the compact ***RVS-DX with built in bypass*** ensure smooth, step-less acceleration and deceleration of AC induction motors, eliminating high inrush currents and mechanical shocks to the motor and the load. The product is UL listed and manufactured under ISO9001:2000. Marine duty and explosion proof models are also available.
